

[DOCUMENT NAME] Abstract

The present invention provides a seasoning processing system capable of uniform
5 seasoning and, moreover, having superior cleanability. A seasoning processing system (2)
according to the present invention comprises a seasoning dispersion apparatus (20) and a
vertical pillow-type bag manufacturing and packaging apparatus (30). The seasoning
dispersion apparatus (20) disperses powdered seasoning to be adhered to supplied
intermediate articles (X...X) from an end part (22b), which is a dispersing mouth, of a second
10 conduit (22). The vertical pillow-type bag manufacturing and packaging apparatus (30)
introduces and packages inside a bag shaped packaging material (Fc) seasoned articles
(X2...X2) to which the powdered seasoning has been adhered. Furthermore, the end part
(22b), which is the dispersing mouth, of the second conduit (22) is provided and arranged so
that it is positioned inside the bag shaped packaging material (Fc).
